

Cleaning concentrates and HD cleaner for the maintenance, care and operations of machinery, plants and plant equipment and floors

Application	Product	Product parameter	Product features	Your advantage	Your benefit
Machinery maintenance cleaning	ESKAPON E 5300	<p>Application concentration: 1 - 25%, Application temperature: 20 - 90°C</p> <p>Used as spraying application, immersion with/without ultrasonic support and with steam jet devices</p>	Versatile, foam-free, non-hazardous cleaner	Advanced detergent with very low hazardous potential and high cleaning power 1:100 diluted with water	<p>Low risk potential for co-workers</p> <p>High cleaning effect, easy storage</p>
Machinery maintenance cleaning	ESKAPON E 5060	<p>Application concentration: 1 - 25%, Application temperature: 20 - 100°C</p> <p>Used as spraying application, immersion with/without ultrasonic support and with steam jet devices</p>	Low alkaline, non-flammable cleaner with a pleasant odour	Powerful cleaner with corrosion protection 1:100 diluted with water	Clean surfaces, simplified workflows

Cleaning concentrates and HD cleaner for the maintenance, care and operations of machinery, plants and plant equipment and floors

Machinery maintenance cleaning	ESKAPON E 5200	<p>Application concentration: 1 - 10%, Application temperature: 20 - 90°C</p> <p>Used in steam jets, ultrasonic systems and hot water high pressure equipment</p>	Mild alkaline, fluorescent, non-flammable liquid with pleasant odour	Tried and tested, versatile cleaning product with high dirt absorption 1:100 diluted with water	<p>One product for many applications</p> <p>Cuts storage costs</p>
Floor cleaner	ESKAPON E 5305	<p>Application concentration: 1 - 5%, Application temperature: 20 - 90°C</p>	Powerful floor cleaner with mild odour	Fast, efficient cleaning, low risk potential	Clean floors in no time, pleasant odour
Vehicle cleaning	ESKAPHOR HD 6	<p>Application concentration: approx. 1%, Application temperature: 20 - 100°C</p> <p>Used in brushing, washing, steam jet and high pressure cleaning applications</p>	Product for use in high-pressure cleaners with high-quality detergents and special additives	No impact on sensitive surfaces such as varnish, plastic, aluminium, zinc	Cleans also sensitive surfaces vigorously

Cleaning concentrates and HD cleaner for the maintenance, care and operations of machinery, plants and plant equipment and floors

Vehicle cleaning	ESKAPHOR HD 89	Application concentration: approx. 1%, Application temperature: 20 - 100°C Used in brushing, washing, steam jet and high pressure cleaning applications	Phosphate-free, alkaline, liquid, highly concentrated detergent for vehicle cleaning	Removes easily hard-to-clean dirt	Powerful cleaning Used for many undercoats
