

## Cleaning with modified alcohols in closed washing systems

Application	Product	Product parameter	Product features	Your advantage	Your benefit
Degreasing small parts in closed solvent cleaning systems	ESKAPHOR S 11.330	Flashpoint: 61°C Limited water-miscibility, non-polar properties, free of chlorinated hydrocarbon	Good grease and oil solubility Removes polishing and lapping pastes High flashpoint, low toxicity, distillable	Alternative to chlorinated hydrocarbon Very clean parts surface, No emission	Compliance with environmental standards and occupational health and safety Optimal parts quality, Low consumption
Degreasing small parts in closed combined cleaning systems (diluted solvent mix)	ESKANOL 11.245-2	Flashpoint: 59°C Limited water-miscibility Polar and non-polar properties Free of chlorinated hydrocarbon	Good grease and oil solubility Good soluble properties for salts and emulsions Removes polishing and lapping pastes Distillable	Alternative to chlorinated hydrocarbon Very clean parts surface, No emission	Compliance with environmental standards and occupational health and safety Optimal parts quality, low consumption
